

Task force

Support for your finance function

Our task force team offers you efficient and reliable solutions to deal with emergency situations and unforeseen events. It accompanies you as a partner on your accounting, tax and HR issues with a long-term perspective.

Our tailor-made solutions

- **We offer a solution for the absence of a member of your team** in the shortest possible time and for the period that suits you. We ensure the continuity of your activity and the perpetuation of your know-how.
- **We relieve your employees** during critical periods so that they can carry out their tasks in the best conditions.
- Thanks to the allocation of resources and dedicated skills, **we support you in your strategic and operational projects** (restructuring, reorganisation of the finance function, change of accounting reference system or IT system).
- **We help you to deal with a loss of control over your accounts**, to restore order to deficient accounting, to secure closing processes and to optimise resources.
- **We offer a proactive intervention**, in order to limit the potential risks linked to the loss of a key employee of your organisation. In this context, we can analyse and document your processes to ensure the continuity of your financial and payroll services.

Our added value

Reactivity
