

INVITATION TO THE WEBINAR

Upcoming Changes in the World of VAT 2020
Discuss with our experts what this would mean
for your business model!

Dear Sir or Madam,

In October 2017, the European Commission has launched its proposal for one of the largest VAT reform in a quarter of a century (so-called EU Action Plan on VAT). The VAT proposal of the European Commission should improve and modernize the system for governments and businesses and will mainly affect the companies working on a crossborder level. The implications for businesses are significant, complex and far-reaching.

The main goal of the EU VAT proposal is to tackle cross-border VAT fraud. As part of the EU Action Plan on VAT, on 1 January 2020 substantial amendments will come into force ('quick fixes'). This requires preparations for businesses in terms of

- understanding of the new rules
- identifying the impacts on the respective business models
- establishing processes in order to comply with these regulations
- negotiating with business partners (i.e. suppliers, customers) about new or amended contracts.

We are looking forward to welcoming you.
Global VAT & Indirect Tax Group

Dates

26 and 28 November 2019

AGENDA

- **Overview about recent developments**
