

ESG e-Campus by Mazars

Course overview

Contents

Course	Target	Duration	Program summary
Introduction to sustainable procurement	Companies	3 hours	Introduce your purchasing teams to sustainability issues related to supply chains. They will be able to understand the company's sustainable purchasing strategy and contribute to its implementation through key actions.
Introduction to corporate sustainability	Companies	3 hours (adaptation possible)	This online course presents the major sustainable development issues facing companies and the consequences they will have on their operations and organizations, as well as on the various functions. Aimed at all employees of a company , the course encourages interaction with the learner and offers different formats (texts, animated diagrams, videos, etc.). It is based on numerous illustrations and examples from companies. Quizzes verify the acquisition of the concepts covered.
Towards a sustainable business model	Companies	3 hours (adaptation possible)	This online course is intended for company executives or board members. It presents the challenges of sustainable development as they apply to companies from a strategic and business perspective, addressing issues of governance, business models and offerings. It is based on numerous illustrations and a reasoning based on risks and opportunities.

Contents

Course	Target	Duration	Program summary
Managing sustainable procurement	Professionals Companies	20 hours over 3 months	<p>Aimed at buyers in general and 'Sustainable Procurement' relays in particular, this online course is designed to provide a comprehensive overview of sustainability issues for procurement/purchasing/sourcing. At the end of this course, you will be able to master the principles of a Sustainable Purchasing strategy and will have the skills and tools necessary to implement sustainability in supply chains, to control social and environmental risks with your suppliers, to improve the "sustainable" performance of referenced products and services and finally, to accompany this transformation within the Purchasing teams and with your suppliers.</p>
Managing climate strategy	Professionals	40 hours over 5 days	<p>Designed for Climate Strategy Managers, this 5-day training course (2 days + 3 days at 15-day intervals) complements the online training course 'Managing a Climate Strategy' with more in-depth methodologies, expert presentations, witnesses involved in corporate decarbonization, case studies, etc. These new skills are essential for leading the company's transformation project and anticipating all the issues of organization, governance, management and impact on the company's business model.</p>
